Control- and isolating transformer TT1 5-4-23

Standards

Control transformer

to: VDE 0570 Teil 2-2, DIN EN 61558-2-2, EN 61558-2-2, IEC 61558-2-2, UL 5085-1/-2, CSA 22.2 No.66

Isolating transformer

to: VDE 0570 Part 2-4, DIN EN 61558-2-4, EN 61558-2-4, IEC 61558-2-4, UL 5085-1/-2, CSA 22.2 No.66

Advantages

| Safe galvanic isolation | | | |
|--|--|--|--|
| Patented assembly technology | | | |
| Very good corrosion protection and low noise thanks to BLOCK IMPEX vacuum impregnation | | | |
| Primary side ± 5 % tappings for voltage adjustment | | | |
| Fixed, contact protected screw connection terminals complying with UVV BGV A3 | | | |
| Multi-functional mounting brackets with 8 slots | | | |
| Space saving, thanks to horizontal design | | | |
| Integrated crane eyes | | | |
| Non-slip terminals | | | |

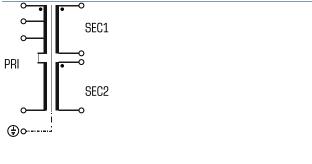

Applications

Isolating transformer for the safe electrical isolation of the input and output sides. The transformer may be used to set up protective separation as a protective measure in accordance with VDE 0100.

As a control transformer for the electrical isolation of the input and output sides.The construction of the transformer is designed to supply control systems according to EN 60204.

As a safety isolating transformer for the safe electrical isolation of the input and output sides. The transformer is suitable for creating SELV and $\ensuremath{\mathsf{PELV}}$ circuits because of the limit on the output voltage.

Sample application

Approvals

UL 5085, CSA 22.2 (E 103521)
